

SERIES TRAINING
FOR PCC PARTICIPANTS

Series Statements and Authority Records

Prepared by:
Judith A. Kuhagen
Cataloging Policy and Support Office
Library of Congress

Revised August 2002

SERIES TRAINING

PURPOSE: The purpose of this course is to train PCC catalogers to record series data in bibliographic records and to create series authority records.

The course will not emphasize content designation other than the series fields in the bibliographic record and the fields in the series authority record not found in a name authority record.

LEARNING OBJECTIVES:

Trainees will be able to:

- 1) search for series data in the database;
- 2) identify in items those series elements that are included in bibliographic records and series authority records;
- 3) select and input data for the series field(s) or quoted note in a bibliographic record according to cataloging and content designation directives;
- 4) select and input data for the series authority record from the item and from records in the database according to cataloging and content designation directives.

These objectives will be accomplished through lectures, handouts, demonstrations, and exercises.

SERIES TRAINING SCHEDULE

Day One

- Session 1: Sources; Series statements
- Session 2: Heading
- Session 3: Searching
- Session 4: Bibliographic details
- Session 5: Treatment

Day Two

- Session 6: Subseries
- Session 7: Qualifiers
- Session 8: References

Day Three

- Session 9: Series-like phrases
- Session 10: Multipart items
- Session 11: Successive entries
- Session 12: Modifying SARs
- Session 13: General review

SERIES AUTHORITY RECORD DOCUMENTATION

Coverage: AACR2; Library of Congress Rule Interpretations (LCRI); MARC 21 Authority Format (AF); Descriptive Cataloging Manual Z1 "yellow pages" (Z1)

I. General (Z1: Introd.; Z1: MARC-S fields)

II. Series heading (Z1 1XX)

- A. Sources of information (.0B2 in each chapter (3.0B3, 12.0B3); LCRI 1.6A2)
- B. Languages (1.0H; LCRI 1.0H; LCRI 1.6; LCRI 1.6B, LCRI 1.6C)
- C. Subseries (1.6H/LCRI; 12.1B4-12.1B6/LCRI; LCRI 25.5B)
- D. Inclusions and omissions (LCRI 1.6B; LCRI 1.6G; 12.1B2; 12.1B3/LCRI; 12.1B7/LCRI; LCRI 25.5B; Z1 1XX)
- E. Successive entry required (LCRI 1.6; LCRI 1.6H; 21.2A/LCRI; 21.2C/LCRI; 21.3B/LCRI)

III. Bibliographic details

- A. Source data citation = 670 field (AF 670; Z1 670)
- B. Numbering information =640-642 fields (LCRI 1.6B; 1.6G/LCRI; 12.3G/LCRI; LCRI 21.30L; AF 640-642; Z1 640, 642)
- C. Publishing information = 643 field (AF 643; Z1 643)
- D. Other information =022, 667, 675 fields (AF 022, 667, 675; Z1 022, 667, 675)
- E. Cataloging source = 040 field (AF 040; Z1 040)
- F. Fixed field information =008 field (AF 008; Z1 008)

IV. Treatment (AF 64X; Z1 64X; Z1 MARC-S fields)

- A. Analysis practice = 644 field (AF 644; Z1 644)
- B. Tracing practice = 645 field (AF 645; Z1 645; LCRI 21.30L)
- C. Classification practice =646 field (AF 646; Z1 646)
 - 1. LCC call number (AF 050; Z1 050)
 - 2. Other call number (AF 060, 070, 082, 090; Z1 090)
- D. Republications (Z1 64X; LCRI 2.7B7)
- E. Document series (Z1 64X)
- F. Technical report series (Z1 64X)

V. Qualifier in heading

- A. Conflict conditions (LCRI 25.5B; LCRI 26.5A; Z1 Introd.)
- B. Resolving conflict (LCRI 25.5B)
- C. Non-conflict situations (LCRI 25.5B, 25.5C, 25.5D, 25.8/LCRI)

VI. References (AF Tracings and References; Z1 670)

- A. See references (AF 4XX; LCRI 21.2A; 26.5A/LCRI; 26.5B/LCRI)
- B. See also references (AF 5XX; Z1 5XX; 26.5A/LCRI)
- C. Linking references (Z1 Introd.; Z1 4XX; LCRI 26.5A)

VII. Re-establishing a series

- A. Change in heading or successive entry? (Z1 Introd.)
- B. Classification practice (Z1 64X; Z1 646)

VIII. Series-like phrases

- A. Decision : series or series-like phrase (LCRI 1.6)
- B. Series authority record (Z1, Introd.; Z1 64X; Z1 667)

DEFINITIONS

Series: A group of separate items related to one another by the fact that each item bears in addition to its own title proper, a collective title applying to the group as a whole. The individual items may or may not be numbered. (AACR 2)

Multipart item: A monograph complete, or intended to be completed, in a finite number of separate parts. The separate parts may or may not be numbered. (AACR 2*)

Series-like phrase: A character string (words, letters, combination of letters and numbers) not considered to be a series.

Serial: A continuing resource issued in a succession of discrete parts, usually bearing numbering, that has no predetermined conclusion. Examples of serials include journals, magazines, electronic journals, continuing directories, annual reports, newspapers, and monographic series. (AACR 2*)

[Definition prior to *AACR 2, 2002 Revision*: A publication in any medium issued in successive parts bearing numerical or chronological designations and intended to be continued indefinitely. Serials include periodicals; newspapers; annuals (reports, yearbooks, etc.); the journals, memoirs, proceedings, transactions, etc., of societies; and numbered monographic series.]

Numbering: The identification of each of the successive items of a publication. It can include a numeral, a letter, any other character, or the combination of these with or without an accompanying word (volume, number, etc.) and/or a chronological designation. (AACR2)

Preliminaries: The title page(s) of an item, the verso of the title page(s), any pages preceding the title page(s), and the cover. (AACR 2) ... "Cover" in the list of sources means pages 1, 2, 3, and 4 of the cover, both flaps of the cover, and the spine. ... (LC RI)

Subseries: A series within a series (i.e., a series that always appears in conjunction with another, usually more comprehensive, series of which it forms a section). Its title may or may not be dependent on the title of the main series. See *also* Section. (AACR 2)

* = change in *AACR2, 2002 Revision*

FIELDS IN SERIES AUTHORITY RECORDS

- 010 [Library of Congress Control Number; LCCN]
- 022 International Standard Serials Number (ISSN)
- 040 [Cataloging Source]
- 050 Library of Congress Call Number
- 060 National Library of Medicine Call Number
- 070 National Agricultural Library Call Number
- 082 Dewey Decimal Call Number
- 090 Local Call Number
- 1XX [Heading]
- 4XX [See References]
- 5XX [See Also References]
- 640 Series Dates of Publication and/or Volume Designation
- 641 Series Numbering Peculiarities
- 642 Series Numbering Example
- 643 Series Place and Publisher/Issuing Body
- 644 Series Analysis Practice
 - f = analyzed in full
 - p = analyzed in part
 - n = not analyzed
- 645 Series Tracing Practice
 - t = traced
 - n = not traced
- 646 Series Classification Practice
 - s = separately
 - c = as a collection
 - m = with main or other series
- 667 [Note; General Note]
- 670 [Source Data Found; Work Cat. Citation]
- 675 [Source Data Not Found]

008 The fixed fields listed below are either unique to SARs or have/had a special application for SARs. The other fixed fields won't be covered during training sessions.

008/12: type of series; OCLC = Series; RLIN = SRT

- a = series
- b = multipart item
- c = phrase
- z = other series (serial)

008/13: numbered/unnumbered; OCLC = Ser num; RLIN = SRN

- a = numbered
- b = unnumbered
- c = numbered/unnumbered

008/32: undifferentiated personal name; OCLC = Name; RLIN = UPN

- a = differentiated personal name
- b = undifferentiated personal name
- n = not applicable

[code n used for all SARs until 3-21-91]

008/33: status of authority heading; OCLC = Auth status; RLIN = STH

- a = fully established heading
- b = memorandum
- c = provisional
- d = preliminary [not used for SARs]
- n = not applicable

TAB PAGE SESSION 1

Session 1 -- Sources; Series statements in bibliographic records

I. Introductions

II. Course objectives *(Handout)*

III. Scope of course & plan for sessions *(Handout)*

- A. What not covering
- B. Handouts and exercise answer sheets in MARC 21
- C. Focus generally on series with specific sessions on multipart items and phrases

IV. Documentation list *(Handout)*

V. Definitions *(Handout)*

VI. Fields/tags in series authority record *(Handout)*

VII. Series sources

A. Overview

- 1. Prescribed source (2.0B2; 3.0B3; 5.0B2, etc.; 12.0B3) *(Handout #1)*
- 2. Different forms of series title (1.6B2)
- 3. Priority order based on 12.0B3 (LCRI 1.6A2, 2.0B2, 3.0B3, 5.0B2, etc.) *(Handout #2)*
- 4. Embedded information (LCRI 1.6A2) *(Handout #3)*
- 5. Not series *(Handouts #4-#5)*
- 6. Different editions *(Handouts #5A-#5D)*

B. 500 note needed for location (LCRI 1.6A2)

- 1. On label
- 2. Stamped on item
- 3. On jacket -- series statement bracketed

C. Non-locations (LCRI 1.6)

- 1. In cataloging data in item -- LC searches to see if already an SAR with 646 = "c"
- 2. In bibliography

VIII. Series title

A. Determine title first

- 1. Where does it begin? Where does it end?
 - a. Typography and spacing
 - b. Statement of responsibility grammatically connected
- 2. Title in full plus initialism of title (12.1B2) *

3. Words not part of title:
 - a. Introductory words (1.1B1) *
 - b. Compare other sources (12.1B3/LCRI 12.1B3)
4. Inaccuracies (12.1B1)

B. Then transcription

1. Based on 245 transcription (1.1B)
2. Appendix A: Capitalization
 - a. A.4A1
 - b. LCRI A.4A1
 - c. LCRI A.4D1
3. Subfielding different in 4XX: no Ꞥb or Ꞥc

C. *Title exercise*

IX. Series statement (4XX in bibliographic record)

A. Source for title

1. 1.6B1
2. 1.6B2
3. Priority order (2.0B2; 3.0B3; 5.0B2, etc.; 12.0B3)

B. Series title in more than one language

1. Separate sources in different languages (1.0H)
 - a. Selection of source
 - b. Title proper
 - c. No parallel title in bibliographic record
 - 1) Added title-page title for analytic title
 - 2) SAR 430 for series title in other language(s)
2. One source with series title in more than one language
1.6B1/1.1B8, 1.6C/1.1D2, LCRI 1.6B, LCRI 1.6C, LCRI 1.1D2)
(Handout #6)
 - a. Title proper
 - b. Parallel title(s)

C. Other elements of series statement

1. Other title information (1.6D)
2. Statement of responsibility (1.6E, LCRI 1.6E1)
3. ISSN (1.6F, LCRI 1.6F)
4. Numbering (1.6G, LCRI 1.6G-1.6G3)
 - a. Appendix B: Abbreviations for terms with numbering
 - i. Full word → prescribed abbreviation
 - ii. Found abbreviation → prescribed abbreviation (B.5B)

- b. Appendix C: Numerals
 - i. Roman numeral → generally arabic numeral
 - ii. Ordinal numeral
 - Full word → convert per LCRI C.8
 - Found abbreviation → found abbreviation

- c. Specific situations covered in LCRI

- 5. Subseries (1.6H) -- in session 6
- 6. More than one series (1.6J, LCRI 1.6J)
- 7. ~~≠~~ *exercise*

X. Conclusion/Review

- A. Where do you find indication of prescribed source of information for series statement?

Answer:

- B. What does "priority order of sources" mean?

Answer:

- C. On what other area of description are the rules for transcription of series statement based?

Answer:

- D. If your single source has series title in more than one language, which one do you select as title proper in the series statement? What happens to the other titles?

Answer:

X. Questions?

XI. *4XX exercise*

* = change in *AACR2, 2002 Revision*

Source of Series Data -- Text

The whole publication is the prescribed source for the series area (2.0B2, 12.0B3).

The series title is transcribed in bibliographic record's series statement if ---

it is found in a formal presentation (usually in the preliminaries, colophon, or publisher's listing at the end of the volume);

or

it is embedded in text in the preliminaries or colophon.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the following priority order: series title page, analytic title page, cover, rest of the pages (2.0B2, 12.0B2). [Information about series title in different languages on the same source and sources for series/subseries given later.]

"CDRI contribution" vs. "Contribution"

If a series title is embedded in text in source outside the preliminaries or colophon, do not transcribe it in a series statement. Instead, generally give this information in a note in the bibliographic record.

"Damascus road" vs. "Guide to reading the Bible"

Finally, at times it appears there is a series title but further consideration will result in determination there isn't a series title.

"Career opportunities" vs. "Case presentations ..."

Be careful: not all editions are in a series or in same series.

"Fifteenth century series"

"Irwin Professional ..." vs. "Business One Irwin ..."

Source of Series Data -- Cartographic Materials Other Than Atlases

Prescribed source of information for the series area: chief source of information (i.e., item itself, container/case/stand), accompanying printed material (3.0B2, 3.0B3).

The series title is transcribed in bibliographic record's series statement if ---

it is found in a formal presentation on the item itself, on container/case/stand, or in preliminaries or colophon of accompanying printed material

or

it is embedded in text on the item itself, on container/case/stand, or in the preliminaries or colophon of accompanying printed material.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the following priority order: item itself, container/case/stand, accompanying printed material.

series title on map recto: Map series

series title on t.p. of brochure: Geologic map series

transcribe as series title: Map series

If the series title is present in more than one form in the same source and that source is the priority order source: choose the form that would be the better series title and/or would appear to be the more stable title.

If a series title is embedded in accompanying printed material in source outside the preliminaries or colophon, do not transcribe the series title in a series statement. Instead, generally give information in a note in the bibliographic record.

preface of accompanying brochure: "Maps in this **RESOURCE MAP SERIES** will update ..."

Source of Series Data -- Music

Prescribed sources of information for the series area for published music are the following:

series title page, title page, caption, cover, colophon, other preliminaries.

The series title is transcribed in a bibliographic record's series statement if ---

it is found in a formal presentation

or

it is embedded in text in the preliminaries or colophon.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the following priority order: series title page, title page, caption, cover, colophon, other preliminaries.

Record in brackets any data element in the series statement not transcribed from one of the sources listed above.

If a series title is embedded in text in source outside the preliminaries or colophon, do not transcribe it in a series statement. Instead, generally give this information in a note in the bibliographic record.

Source of Series Data -- Sound Recordings

Prescribed sources of information for the series area for sound recordings are the following: chief source of information; accompanying textual material, container (6.0B2). Each type of sound recording has its own chief source of information (6.0B1): e.g., disc and label for disc, cassette and label for tape cassette, etc. If information for the series area is transcribed from another source, enclose the information in brackets.

The series title is transcribed in bibliographic record's series statement if ---

- it is found in a formal presentation in chief source of information, in preliminaries or colophon of accompanying textual material, or on the container
- or
- it is embedded in text in chief source of information, in preliminaries or colophon of accompanying textual material, or on the container.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the following priority order: chief source of information; accompanying textual material, container (6.0B2):

- e.g.: form on disc label preferred over form on accompanying textual material;
- form on accompanying textual material preferred over form on container.

If a series title is embedded in text outside the preliminaries or colophon in accompanying textual material, do not transcribe the series title in a series statement. Instead, generally give information in a note in the bibliographic record.

Source of Series Data -- Motion Pictures and Video Recordings

Prescribed source of information for the series area: chief source of information (i.e., item itself, its container if the container is an integral part of the piece), accompanying material (7.0B1, 7.0B2).

The series title is transcribed in bibliographic record's series statement if ---

it is found in a formal presentation in the item itself, on its "integral" container, or in preliminaries or colophon of accompanying textual material

or

it is embedded in text in the item itself, on its "integral" container, or in the preliminaries or colophon of accompanying textual material.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the following priority order: item itself, its "integral" container, accompanying textual material.

e.g.: form in title frame preferred over form on "integral" container;
form on "integral" container preferred over form in accompanying textual material.

If a series title is embedded in accompanying textual material in source outside the preliminaries, do not transcribe the series title in a series statement. Instead, generally give information in a note in the bibliographic record.

Sources ... - #1F (Electronic resources)

Source of Series Data -- Electronic Resources

Prescribed sources of information for the series area for electronic resources are the following: chief source of information; information issued by the publisher, creators, etc.; container (9.0B2). Record in brackets any data element in the series statement not transcribed from one of these sources.

Because the chief source of information is the resource itself (9.0B1), the indication of location of usage (in SAR 670 field) on which the heading is based is, therefore, very important. For direct access electronic serials, prefer the physical carrier or its labels as the chief source of information (12.0B2b).

The series title is transcribed in bibliographic record's series statement if ---

- it is found in formal presentation in chief source of information, on physical carrier or its labels, in information issued by the publisher ..., on container
- or
- it is embedded in text in chief source of information, on physical carrier or its labels, in preliminaries or colophon of information issued by the publisher ..., on container.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the following priority order: chief source of information; the carrier or its labels; information issued by the publisher, creators, etc.; container (9.0B2).

e.g.: form on title screen of monograph preferred over form on container.

Source of Series Data -- Microforms

The prescribed sources for the series area for original microforms are the chief source of information, rest of the item, container (11.0B2). Each type of microform has its own chief source of information (11.0B1): e.g., title frame for microfilm, title frame for microfiche unless information on header is more complete, etc. If information for the series area is transcribed from another source, enclose the information in brackets. The printed guide is often a common source of series title.

The prescribed sources for the series information in note for microform republications are those listed in the AACR2 chapter for the type of original item.

If the series title is present in only one source, that source is used for the series title.

If the series title is present in more than one source but the series title is the same in all sources, any source can be used for the series title.

If the series title is present in more than one source and the series title is not the same in all sources, choose the chief source based on the priority order given in Ch. 11 for original microforms (chief source of information, rest of the item, container (11.0B2)) or the priority order given in the appropriate AACR2 chapter for microform republications.

e.g.: original microfiche: form on title frame preferred over form on container
microfiche reproduction of book: form on mono t.p. preferred over form on cover (2.0B2)

Formula for original microforms:
 catalog the microform
 give series in 4XX
 SAR: no #5 "microform"

Formula for microform republications:
 catalog the original
 give series in 533
 SAR: #5 "microform"

Univ. of Michigan's book

THE FIFTEENTH CENTURY SERIES

Advisory Editor: Ralph A. Griffith, Professor of Medieval History, University of Idaho, Moscow

THE FIFTEENTH CENTURY SERIES is a tribute to the vitality of scholarly study of the later Middle Ages (and especially of the fifteenth century) and to the commitment of Alan Sutton Publishing to make its conclusions widely available. This partnership, which Charles Ross did much to encourage, has been extraordinarily productive in the quarter-century since the pioneering colloquium on 'The Fifteenth Century, 1399-1509: Studies in Politics and Society' was held in Cardiff and presided over by S.B. Chitney. The proceedings of that colloquium, edited by S.B. Chitney, G.D. Ross and R.A. Griffith, were published in 1972. Since 1979 Alan Sutton Publishing has published no fewer than twelve volumes of papers, invited especially from younger scholars and discussed at further colloquia, which have become a notable feature of the young historians, noteworthy features of these volumes are the breadth of topics addressed, the novelty of approaches adopted, and the participation of scholars from North America and the European Continent. The volumes have proved influential and informative, and there is good reason to include future volumes in a major new series, both to recognize the achievements of the present generation of fifteenth-century historians and to consolidate the interest in later medieval history which they have undoubtedly generated.

It is appropriate that THE FIFTEENTH CENTURY SERIES should be inaugurated by a volume of papers delivered in 1993 at a colloquium, held at Durham, which focused on K.B. McFarlane (1903-66) and the contribution which his teaching and writings have made to later medieval historiography. He gave a unique stimulus to the study of English politics and society, especially in the fifteenth century: his insights have been adapted and developed, sometimes supplemented, and even occasionally challenged. This has been achieved in a spirit of friendly and constructive discussion which has marked the twenty or so colloquia since the first in Cardiff in 1970. *The McFarlane Legacy* is a fitting beginning to THE FIFTEENTH CENTURY SERIES. Subsequent volumes will include:

Urban, Government and People in the Fifteenth Century, ed. R.E. Archer
North of England in the Age of Richard III, ed. A.J. Pollard.

Series title proper & parallel title(s): 1.6B1 → 1.1B8
 1.6C1 → LCRI 1.6C → 1.1D2 → LCRI 1.1D2

Summary: Choose title proper of series based on language of text*; give first parallel title; give English parallel title if not already transcribed.

(*If not possible, choose first presentation as title proper.)

Special situation: If title proper and first parallel title are in nonroman scripts and no title is in English, give as second parallel title the one that is in French, German, Spanish, Latin, any other roman alphabet language (in that order).

TAB PAGE SESSION 2

Session 2 -- Heading

I. Introduction

II. No SAR (Z1: Introd.)

- A. Republication lacking original series statement
- B. Periodical unless by exception
- C. Hardcover/softcover edition of selected issue of periodical
- D. Unanalyzable multipart item -- your choice; administrative decision at LC generally not to make SAR
- E. FYI: Administrative decision at LC generally not to make SAR for an unnumbered multipart item processed as a made-up set (LC's "2A" cataloging)

III. How many headings? (summarized in Z1: Introd.)

- A. Title variations and changes in responsibility (21.2A/LCRI 21.2A, 21.2B2/LCRI 21.2B2, 21.2C, LCRI 21.2C, 21.3A2, LCRI 21.3A2, 21.3B, LCRI 21.3B) -- session 11

- B. Language editions (LCRI 1.6) (*Handouts #1-#5*)

- 1. One heading/one SAR

- a. Numbered not in separate language editions
 - b. Default decision
 - c. Heading vs. series statement title proper: which language?
 - i. Heading = generally, language presented first on source (1.1B8, 2nd sentence) unless you know that series as a whole is likely to be in one of the other languages
 - ii. Series statement title proper = language matching language of text, etc. (1.1B8, 1st sentence)

- 2. Two headings/two SARs

- a. All unnumbered
 - b. Numbered if separate language editions

- C. Numbered -- unnumbered (LCRI 1.6)

- 1. One heading/one SAR

- a. If some have number and others don't
 - b. Unnumbered now numbered and counted earlier volumes
 - c. Starts new numbering system --- may or may not be preceded by designation "new series," "second series," etc. *
 - d. Default decision

- 2. Two headings/two SARs
 - a. Unnumbered to numbered -- starts with 1
 - b. Numbered says changing to unnumbered
 - D. Letters at end of title (LCRI 1.6B, LCRI 1.6G) (*Handouts #6-#7*)
 - 1. One heading/one SAR
 - a. When letter changes from one issue to another
 - b. Default decision
 - 2. Two headings/two SARs for two separate series
 - E. Main series and subseries (1.6H/LCRI 1.6H) -- session 6
 - F. Re-establishing a series (Z1: Introd.) -- session 3
 - G. Original and republication (Z1: 64X) -- session 5
- IV. Form of heading
- A. Choice of entry (Ch. 21)
 - B. Omissions (Z1: 1XX)
 - 1. Initial article in ¶a and ¶p
 - 2. Parallel title(s)
 - 3. Other title information
 - 4. Statement of responsibility
 - 5. ISSN
 - 6. Numbering
 - C. Additions to title proper - session 7
- V. Conclusion/Review
- A. What is default decision when considering whether to have one heading or two headings (i.e. how many SARs) for series that appear in one language on one volume and another language on another volume?
Answer:
 - B. What is default decision when considering whether to have one heading or two headings (i.e. how many SARs) for series that has letters at end of title?
Answer:
 - C. What parts of series statement and series information on item are not included in heading on SAR?
Answer:

VI. Questions?

VII. *General exercise*: determine bibliographic 4XX and SAR 1XX.

- A. Assume only conflict is with title consisting only of generic word(s)
- B. Don't worry about NAR form

* = change in *AACR2, 2002 Revision*

Different Language Editions?
(LCRI 1.6)

Numbered - issued in parallel editions

SAR for each edition:

Assign uniform title per 25.3C3; add language name in subfield #l (25.5C1)

Do not connect headings with 5XX references.

Numbered - not issued in parallel editions (also the default decision)

One SAR based on first item in series:

If that item has series title in two or more languages:

If two or more chief sources in different languages, apply 1.0H.

If one chief source, generally apply 1.1B8, 2nd sentence to choose title proper for heading unless you know what the language of the series as a whole will be. (Remember: apply 1.1B8, 1st sentence to choose title proper for series statement.)

Give other language title(s) as 4XX references.

If first item is not in collection, base SAR on earliest item in hand and code record "provisional."

Unnumbered - issued/not issued in parallel editions

SAR for each title:

Connect headings with uncoded 5XX references (can code as "earlier/later" references if no research is needed).

Do not assign 25.3C3 uniform title. [administrative decision for LC/PCC]

Letter(s): title or numbering designation?

(LCRI 1.6B, RI 1.6G)

More than one numbering sequence

series titles on items: Research report A1
Research report B1

two SARs: #a Research report. #n A [or: #a Research report A
 #a Research report. #n B #a Research report B]

642 in each SAR: 1

series statements in bibl. records:

440 0 #a Research report. #n A ; #v 1

440 0 #a Research report. #n B ; #v 1

[or: 440 0 #a Research report A ; #v 1
 440 0 #a Research report B ; #v 1]

One numbering sequence - letter(s) same (also the default decision)

series titles on items: Research report CD1
Research report CD2
Research report CD3

one SAR: #a Research report (_____)

642 on SAR: CD1

series statements in bibl. records:

490 1 #a Research report / _____ ; #v CD1

490 1 #a Research report / _____ ; #v CD2

490 1 #a Research report / _____ ; #v CD3

series added entries in bibl. records:

830 0 #a Research report (_____) ; #v CD1.

830 0 #a Research report (_____) ; #v CD2.

830 0 #a Research report (_____) ; #v CD3.

One numbering sequence - letter(s) different

series titles on items: Research report F1
Research report A2
Research report K3

one SAR: #a Research report (_____)

642 on SAR: 1

series statements in bibl. records:

490 1 #a Research report / _____ ; #v F1
490 1 #a Research report / _____ ; #v A2
490 1 #a Research report / _____ ; #v K3

series added entries in bibl. records:

830 0 #a Research report (_____) ; #v 1.
830 0 #a Research report (_____) ; #v 2.
830 0 #a Research report (_____) ; #v 3.

TAB PAGE SESSION 3

Session 3 -- Searching

I. Introduction: Series searching is DIFFICULT!!!

- A. MOST important step in series work
- B. Motto = NEVER stop after one unsuccessful search

II. New series?

- A. Search for authority record (via ISSN, title, personal name, corporate body name, meeting name) according to possibilities in your database
 - 1. If heading matches NAR and it's same publication, delete NAR and create SAR
 - a. PCC: may want to convert NAR to SAR since can't delete NAR)
 - b. Problem if SAR is for multipart item because NAR may represent more than edition represented by SAR → notify Coop Cat
 - 2. If heading matches SAR 1XX and it's same publication, use it
 - 3. If heading matches SAR 4XX and it's same publication, consider:
 - a. Priority order of sources -- sessions 1 and 11
 - b. 21.2A variations -- session 11
 - 4. If heading doesn't match SAR 1XX or 4XX but it's same publication, consider 21.2A variations -- session 11
 - 5. If no authority record found, search further
- B. Search for analytic bibliographic records:
 - 1. If heading is on AACR 2 bibliographic record, create SAR
 - 2. If your series title
 - a. Matches series title on pre-AACR 2 bibliographic record, re-establish series by creating SAR
 - b. Doesn't match series title on pre-AACR 2 bibliographic record
 - 1) Near-match: 21.2A variations -- session 11
 - 2) Near-match: difference in choice/form related to rules (III. below)
 - 3) Not even a near-match: create SAR

C. High number but no SAR/analytics

1. May not have been analyzed or may have changed from not-analyzable serial to series -- could search for possible collected set record
2. May be successive entry - session 11
 - a. Search via body for other SARs
 - b. If title generic, consult body's NAR for heading change information and then search other name for SARs

III. Changes in cataloging rules represented in database (Z1 Introd.)

A. Choice of entry

1. AACR 1: special rules for serials
 - a. Generic titles under body
e.g., International Geological Association. Research report
 - b. Titles containing initialism under that body
e.g., Bird Watchers Society. BWS bulletin
2. AACR 2
 - a. No special rules for serials
 - b. Most under title per 21.1C1

B. Title truncated: AACR 1 eliminated body for several years

- e.g., Monograph of the Cancer Research Laboratory = Monograph
Cancer Research Laboratory monograph = Monograph

C. Space-hyphen-space: Rev. chapter 6 of AACR 1

1. Generic = add "space-hyphen-space" and body's name
2. Body's name as found: variants, hierarchy
e.g., Publication - The Zoology Department, University of Virginia
Publication - Department of Zoology
Publication - The University of Virginia Zoology Department

D. Subseries direct/indirect

1. AACR 1: if subseries strong, enter directly
e.g., Research in cartography
2. AACR 2: if together on source, enter subordinately
e.g., University publications series. Research in cartography

- E. Body: place vs. direct entry
 - 1. "Superimposition" at beginning of AACR 1: kept ALA headings
 - 2. Bodies were re-established for AACR 2 and all access points except series were corrected
 - e.g., Christchurch, N.Z. University of Canterbury. Dept. of Psychology and Sociology. Research project

- F. Short titles
 - 1. Many common and generic titles
 - 2. AACR 2: title entry needed qualifier to distinguish

IV. Same/similar titles

- A. For same publication (flip-flops) - session 11
- B. For different publications - session 7

V. Untraced (490 0)

- A. No filing indicators: include initial article in any left-match search
- B. LC's MLC analytic records have 490 0 if no SAR exists
- C. BIBCO core-level analytic records have 490 0 if no SAR exists

VI. Strategy:

- A. First issue published 1981-
 - 1. Use AACR 2 forms and search for authority record: ISSN, title, personal name, corporate body name, meeting name (from 1XX, 4XX, 5XX)
 - 2. If SAR not found, search for LC's MLC analytic records, BIBCO core-level analytic records, and/or collected set record
 - 3. Establish SAR and report BFM as needed
- B. First issue published before 1981/Time period of first issue unknown
 - 1. Use AACR 2 forms and search for authority record: ISSN, title, personal name, corporate body name, meeting name (from 1XX, 4XX, 5XX)
 - 2. If SAR not found, search for full level/LC's MLC/BIBCO core-level analytic records and/or collected set record (remember pre-AACR2 possibilities for choice of entry and title transcription)
 - 3. Re-establish series and report BFM as needed

VII. Questions?

TAB PAGE SESSION 4

Session 4 -- Bibliographic details

I. Introduction

II. Source data found citation (670 field) (Z1 670) (*Handouts #1-#2*)

A. Now same as NARs (practice before May 1989: no usage in 1st 670 ‡b)

1. Some "n42-" prefix SARs lack subfield ‡b
2. No need to add usage to first 670 when using/updating SAR

B. Database citations: cite specific analytic (not required for NARs)

**670 ‡a OCLC, Dec. 13, 1999 [title of analytic] [imprint date
of analytic] ‡b ([title of series])**

C. Numbering and name of issuing body not required

D. Flexibility

1. Analytic title required in ‡a; name heading optional
2. GMD optional
3. No required punctuation or style (style used in training handouts and exercises just one possible style)

E. Republication -- see VII. below

III. Numbering information

A. Series numbers to be recorded in series statements (*Handout #3*)

1. Is series numbered? (*Handouts #4-#7*)
2. What is recorded as title and what as designation? (*Handouts #8-#11*)
3. Parallel title(s) (*Handouts #12-#14*)
4. Found abbreviations and full forms: terms and numerals [*Handout #15*]
5. Two numbering systems (*Handout #16*)

B. Series numbering example (642 field) (LCRI 1.6G, LCRI 21.30L, AACR 2 Appendices B-C, Z1 642)

1. Form of numbering used in ‡v of 440/8XX
2. Only if series traced: for benefit of BIBCO, all new SARs traced now (LCRI 21.30L)
3. Matches 1st 670 (unless numb/unnumb)
4. Appendix B.5B
5. Not a sequence
6. Some specific situations: LCRI 1.6G, LCRI 21.30L
7. Repeatable
8. Re-establishing: may need BFM only to change ‡v
9. For benefit of BIBCO: ‡5 DPCC

- C. Series numbering peculiarities (641 field)
 - 1. E.g., double numbering, issues not published
 - 2. Only if info not in 4xx
 - 3. Give source
- D. Series dates of publication and/or volume designation (640 field) (Z1 640)
 - 1. Beginning/ending
 - 2. Most often used: number of vols. in classified separately multipart item

IV. Series place and publisher (643 field) (Z1 643) (*Handout #17*)

- A. If publisher and issuing body are different, publisher here
- B. 260#ab as in bibliographic record
- C. More than one publisher
 - 1. Multiple publishers for same period: all in one 643
 - 2. Different publishers for different periods
 - a. Separate 643s with latest first
 - b. #d for range of volumes or dates
 - 3. Pre-AACR 2 differences usually ignored
 - 4. Too many changes: give information (general or specific) in 667
- D. Same publisher but different place -- usually ignored in 643 unless place is qualifier
- E. Republication -- see VII. below

V. Other information

- A. ISSN (022 field) (Z1 022)
 - 1. Only #a
 - 2. Careful: publishers use old or incorrect ISSN
- B. Source data not found citation (675 field) (Z1 675)
 - 1. Justifies 5XX or 667 link
 - 2. Also no information found --- not used often in SARs
 - 3. Not repeatable but #a is
 - 4. Usage included but no subfield #b

- C. Note(s) (667 field) (Z1 667)
 - 1. Some specific ones listed in Z1 667
 - a. Title/relationship to other publications
 - b. Publishing information
 - c. Type of publication
 - d. Miscellaneous
 - 2. Any other information you feel is important

VI. Fixed field information (008 field)

- A. 008/12: type of series code (OCLC = series; RLIN = SRT)
 - a = series
 - b = multipart item
 - c = phrase
 - z = other series (serial)
- B. 008/13: numbered/unnumbered code (OCLC = Ser num; RLIN = SRN)
 - a = numbered
 - b = unnumbered
 - c = numbered/unnumbered
- C. 008/32: undifferentiated personal name code (OCLC = Name; RLIN = UPN)
 - a = differentiated personal name
 - b = undifferentiated personal name
 - n = not applicable
[code n used for all SARs until Mar. 1991]
- D. 008/33: level of establishment code (OCLC = Auth status; RLIN = STH)
 - a = fully established heading
 - b = memorandum
 - c = provisional
 - d = preliminary [not used for SARs]
 - n = not applicable
 - 1. Provisional SAR possible:
 - a. Different languages but not parallel edition and lack v. 1
 - b. If 100/110/111 heading is provisional on its own NAR
 - c. If you're not sure about need for SAR, heading, etc.
 - 2. Preliminary SAR not allowed

VII. Republication (LCRI 1.6, LCRI 2.7B7, LCRI 21.30L, Z1 64X) (*Handouts #18-#20*)

- A. Must have original series statement to establish series
- B. Bibliographic record
 - 1. Bibliographic history note (LCRI 2.7B7 -- applies to all chapters)
 - 2. 8XX field for series recorded in the note
- C. Same record for original and republication(s)
- D. Change in how much information included in SARs in April 1998; don't delete "extra" 643/670 fields
- E. If SAR is only for republication:
 - 1. One 643 for republication place and producer with ≠d = [Term for republication]
 - 2. One 670 for republished item begins [Term for republication]/
 - 3. Treatment fields include term(s) for republication in library's ≠5 (e.g., ≠5 DLC photo-offset reprint)
 - 4. When processing other kinds of republications:
 - a. Add only appropriate treatment information
 - b. Don't add additional 643 and 670 fields
- F. If SAR is for original and republication(s):
 - 1. 643 field(s) for original
 - 2. 670 field(s) for original
 - 3. Treatment fields include term for republication in library's ≠5 (e.g., ≠5 DLC microfiche)
 - 4. Don't delete republication 643 and 670 fields in an existing SAR
- G. Don't confuse original series with series created by publisher of republication
[Handout #21]

VIII. Conclusion/Review

- A. What information is given in 642 field?
Answer:
- B. How many 643 fields are used for more than one publisher during the same period?
Answer:
- C. How many 643 fields are used for more than one publisher during different periods?
Answer:

D. Name two possible 667 fields.

Answer:

E. In handling a republication what must you have to establish the series?

Answer:

IX. Questions?

X. *General exercise:* add fields from this session.

Abbreviations	terms with numerals; ordinals
Two numbering systems	Quellen und Forschungen zur ... Braunschweiger geographischer ...

cover p. 4

Entre el comienzo de la guerra civil en 1936 y la vuelta de los exiliados republicanos en 1977, se desarrolla todo un capítulo de la historia cultural española que ha permanecido prácticamente oculto hasta nuestros días, dada la hostilidad de los poderes oficiales ante lo que consideraban una desviación heterodoxa de nuestra identidad cultural. José Luis Abellán, Catedrático de la Universidad Complutense, desentierra aquí los datos fundamentales de esa historia marginada y oculta, analizando sus momentos más importantes: significación de la cultura durante la guerra civil, caracterización histórica del exilio del 39, análisis de la llamada teoría del «puente», papel de la filosofía y el pensamiento exiliados en la constitución de una nueva imagen de España y las teorías político-apocalípticas de Juan Larrea sobre la significación de América en el desarrollo de la cultura occidental. La pluma del profesor Abellán, también Premio Nacional de Literatura en 1981, hace un apasionante recorrido por estos temas que gravitan de modo fundamental sobre nuestro presente histórico-político.

excerpt from LCRI 2.7B7 (applies to all resources)**2.7B7. EDITION AND HISTORY.****Republications**

When cataloging a republication (a reissue of a previously published edition by another publisher without change in text), make a note for the previous edition if the information is readily available. Ordinarily begin the note with the phrase "Originally published" (or "Previously published" if the data for the original are not available), followed by a colon-space. (If the republication is a facsimile reproduction, see 1.11.) Include details of publication, etc., and other information appropriate to the particular case. For series, when the republication contains the original series statement as it appeared on the original publication, give in the note the original statement within parentheses (cf. LCRI 21.30L). (Generally it is not necessary to give a bibliographic history note when the republication is a work of the imagination or a classic.)

TAB PAGE SESSION 5

Session 5 -- Treatment

I. Introduction

II. General treatment policy/information (Z1 64X)

- A. Optional fields in SAR
- B. Current default treatment at LC: classified separately, analyzed in full, traced
- C. Don't record/predict LC's treatment
- D. Your library's treatment optional (fields 642, 644-646 are optional in MARC 21)
- E. Use #5 to indicate
 - 1. Which library has that treatment (#5 [library's code])
 - 2. If applies to republication (#5 [library's code + term for republication])
- F. Use #d in paired fields to indicate duration of that treatment in #5 library
 - 1. Precedes #5
 - 2. Display constant = "Applies to"
- G. In new SARs: always give national-level tracing decision to trace for benefit of BIBCO records even if you're not a BIBCO participant: 645 #a t #5 DPCC

III. Treatment fields

- A. Analysis practice (644 field) (Z1 644) (*Handouts #1-#3*)
 - 1. Possibilities
 - a. "f" = in full
 - b. "p" = in part
 - 1) Technical reports at LC
 - 2) Some documents at LC
 - c. "n" = not analyzed
 - 1) "Not needing analysis" --- judgment
 - 2) Non-series serial: SAR made by exception
 - 2. Repeatable
 - a. Different periods of time/copies or different libraries
 - 1) Time periods in inverse chronological order
 - 2) LC treatment before other library's treatment
 - b. #d cut-off
 - 1) Date of processing if only 646 of "c"
 - 2) Number if 646 changing to or from "s"
 - 3) Title of serial or subseries
 - c. #b for exception to analysis practice

B. Tracing practice (645 field) (Z1 645) (*Handouts #1, #4-#5*)

1. Possibilities
 - a. "t" = traced
 - b. "n" = not traced
2. Only if one or more items in series analyzed
3. Repeatable
 - a. Different periods of time/copies or different libraries
 - 1) Time periods in inverse chronological order
 - 2) LC treatment before other library's treatment
 - b. ≠d cut-off
 - 1) Usually date but could be number
 - 2) Most common: AACR 2 implementation date

C. Classification practice (646 field) (Z1 646) (*Handouts #6-#8*)

1. Possibilities
 - a. "s" = classified separately --- not possible if 644 is "n"
 - b. "c" = classified as a collection
 - c. "m" = classified with main or other series
2. Repeatable
 - a. Different periods of time/copies or different libraries
 - 1) Time periods in inverse chronological order
 - 2) LC treatment before other library's treatment
 - b. ≠d cut-off
 - 1) Should be number instead of date
 - 2) Title of serial or subseries

D. LCC call number (050 field) (*Handouts #6-#10*)

1. If 646 is "c" or "m"
2. Repeatable: different periods of time/copies or different libraries
3. Indicators
 - a. 2nd indicator of 0 if assigned by LC
 - b. 2nd indicator of 4 (since Jan. 1999)
 - i. Assigned by other library based on LCC
 - ii. Other library's code in subfield ≠5
4. ≠d cut-off
 - a. Should be number instead of date
 - b. Title of serial or subseries
5. ≠d possible if only one 050: if one of 646 fields is "s"

E. Call number if not based on LCC

1. If 646 is "c" or "m"
2. 060 field (NLM call number) only by NLM: no #5
3. 070 field (NAL call number): #5
4. 082 field (Dewey call number): #5
5. Other call number in 090 field: no #5 (*Handout #10*)

F. Some or all treatment fields may be lacking on some non-LC SARs (*Handout #11*)

G. Some treatment decisions complex: do a step at a time [*Handouts #12-#13*]

IV. Conclusion/Review

A. Must a PCC library include its treatment information?

Answer:

B. In what order are multiple 642-646 fields given?

Answer:

C. What subfield is used to indicate duration of a specific treatment? What display constant is supplied for that subfield?

Answer:

D. What subfield #5 should always appear in the 645 field?

Answer:

E. In what order are #5 given within a treatment field?

Answer:

VI. Questions?

TAB PAGE SESSION 6

Session 6 -- Subseries

I. Introduction

II. Definition/identification

Subseries: A series within a series (i.e., a series that always appears in conjunction with another, usually more comprehensive, series of which it forms a section). Its title may or may not be dependent on the title of the main series. See also Section (Serials). (AACR 2)

III. Sources (LCRI 1.6A2, LCRI 1.6H)

- A. Exception to priority order in 2.0B2; 3.0B3; 5.0B2, etc.; 12.0B3
- B. Two titles in same source in preliminaries, publisher's listing, or colophon
(Handout #1)
- C. If both titles in more than one source, apply priority order

IV. Is it a subseries? (LCRI 1.6H)

- A. Must have an analyzable title
- B. Must also have at least two titles it shares with other items and those titles are related, one being larger than the other
 - 1. Larger = more general vs. smaller = more specific
 - 2. Larger = higher number vs. smaller = lower number
- C. Other possibilities for two titles
 - 1. Two separate series
 - a. Equal subject specificity
 - b. Different issuing bodies
 - 2. Multipart item and serial
 - 3. Two multipart items
 - 4. "New series," "second series," etc. (1.6H3)
 - a. If numbered, as part of ¶v in bibliographic record
"new series, no. 1" = ¶vnew ser., no. 1
 - b. If unnumbered, as subseries
"new series [no number]" = ¶nNew series
 - 5. Supplements
 - a. Numbered "Supplement to ..." = separate series
 - b. Unnumbered = 500 note if not in 245; 730 for main work
 - 6. Default: two separate series (1.6H4)

V. Transcription

- A. Title proper based on 12.1B4-12.1B5
 - 1. Subfield coding different
 - 2. Don't abbreviate words, e.g., Series A -- not Ser. A
 - 3. Don't change roman numerals to arabic numerals
 - 4. ISBD punctuation
 - 5. Capitalization (Appendix A)
 - 6. Titles in more than one language and/or script (1.6H2)
- B. Remainder of series statement (1.6B-1.6G and LCRI 1.6H5-1.6H8; LCRI 1.6H6; LCRI 1.6H7)
- C. *4XX exercise*

VI. Usual subseries situations: series statements and added entries (LCRI 21.30L)

- A. Main series unnumbered (*Handout #2*)
 - 1. 4XX = 1
 - 2. 8XX = 1 unless 4XX = 440
 - 3. SARs = 1
- B. Main series numbered (*Handouts #3-#4*)
 - 1. 4XX = 1
 - 2. 8XX = 2
 - 3. SARs = 2
- C. *Exercise*

VII. Other possible situations: series statements and added entries

- A. Main series & subseries not together in the same source (12.1B6, LCRI 1.6H) (*Handout #5*)
 - 1. 4XX = 2
 - 2. 8XX = 2 unless one or both 4XX = 440
 - 3. SARs = 2
- B. Main series not present (LCRI 1.6B) (*Handout #6*)
 - 1. Title transcription different
 - 2. 4XX = 1
 - 3. 8XX = 1 unless 4XX = 440
 - 4. SARs = 1
- C. Main series appears/disappears (LCRI 1.6H) (*Handout #7*)
 - 1. First time: successive entry (new SAR) - session 11
 - 2. Next time: condense two SARs into one SAR

- D. Numbered supplements (LCRI 1.6)
 - 1. Grammatically linked (*Handout #8*)
 - a. As "usual" title (1.1B1)
 - b. Use established form in reference (LCRI 26.5B)
 - 1) Of series (SAR)
 - 2) Of other serial (AACR2 serial record or an NAR)
 - 2. Not grammatically linked (*Handout #9*)
 - a. As dependent title (1.1B9)
 - b. Use established form in heading (LCRI 26.5B)
 - 1) Of series (SAR)
 - 2) Of other serial (AACR 2 serial record or an NAR)
- E. Special numbers and unnumbered supplements
 - 1. Not considered series (LCRI 1.6)
 - 2. Related work added entry for main work (LCRI 21.30G)

VIII. Conclusion/Review

- A. What is a subseries?
Answer:
- B. What is the source for a series/subseries situation?
Answer:
- C. What determines if you make one or two SARs for a main series and subseries?
Answer:
- D. How are a main series and a subseries handled for a print resource if they aren't together in a source in the preliminaries, publisher's listing, or colophon?
Answer:
- E. What determines how the title proper is constructed for a series that is a numbered supplement to a monographic series/other serial?
Answer:
- F. How are special numbers and unnumbered supplements handled?
Answer:

IX. Questions?

LCRI 1.6A2

Chief Source

The sources for series in the "Prescribed sources of information" in the monograph chapters (2.0B2, 3.0B3, 5.0B2, 6.0B2, etc.) are in priority order, reflecting the principle in 12.0B2.

LC/NACO practice: For main series and subseries, however, a source with both titles in the preliminaries, in a publisher's listing, or in the colophon is the chief source--cf. LCRI 1.6H.

LCRI 1.6H

Applicability

Apply the rules for subseries (based on 12.1B4-12.1B5) if

...

...

3) *LC/NACO practice:* both the main series title and the subseries title appear in the same source in one of the preliminaries, in the publisher's listing, or in the colophon; proximity in the same source is not a factor. If the main series and subseries do not appear in the same source, record each title in its own series statement (cf. AACR2 1.6J).

TAB PAGE SESSION 7

Session 7 -- Qualifiers

I. Introduction

- A. Change in cataloging rules to more title entry for serials: need qualifiers:
 - 1. To distinguish one title from another
 - 2. To bring together main entry, added entries, and links for one serial publication
- B. No "RIGHT" qualifier: depends on context (*Exercise*)

II. Conflict conditions (LCRI 25.5B; LCRI 26.5A) (*Handout #1*)

- A. Need to define "conflict" -- restricted to titles proper
- B. Series/serial/phrase
 - 1. Title & name/title same except for name/initials
 - 2. Phrase to phrase: undifferentiated phrase record -- session 9
- C. Multipart items
- D. References (Z1 Introd.)
 - 1. Always LC policy for regular references
 - 2. Normalization: policy for linking references for old catalog headings
 - 3. If heading conflicts with reference on another record, qualify reference
- E. Search database
 - 1. Search first for series authority record
 - 2. Search for bibliographic records
 - a. 4XX and 8XX in analytic records
 - b. 245 of serial collected set records

III. Resolving conflicts (LCRI 25.5B)

- A. History/past practice
- B. Current practice
 - 1. Two principles
 - a. Don't predict conflict
 - b. Add to heading being established except:
 - 1) Not if new heading conflicts with reference on an existing SAR
 - 2) Not if numbered & unnumbered series by same body and existing SAR is for unnumbered series
 - 2. Choice of qualifiers
 - a. Generic title: corporate body (*Handout #2*)

- b. Other titles
 - 1) Place probably most common choice (*Handout #2*)
 - 2) Can use other qualifiers if another more appropriate since list in LCRI not in priority order
 - 3) Use multiple qualifiers, separated by space-colon-space, if single qualifier doesn't break conflict
- 3. Series, serials, phrases
 - a. Not affected by series vs. phrase or by treatment decisions, e.g., collected classification vs. classifying separately
 - b. Same/similar titles won't necessarily have the same type of qualifier due to changes in practice and changing databases
- 4. Multipart items
 - a. Only consider conflicts if:
 - 1) Manifestation needs one (e.g., translation)
 - 2) Need to use as added entry or subject heading
 - 3) SAR heading made for multipart item
 - b. Guidelines generally same as series/serial/phrase
- 5. Form of qualifier
 - a. AACR 2 form supported by NAR
 - b. Place: delete cataloger addition (same as qualifying in NARs)
 - c. Corporate body : use full heading as on own NAR (different from qualifying in NARs)
- C. Special situations
 - 1. Unnumbered/numbered titles from the same body (*Handout #3*)
 - a. Not when numbering appears/disappears on one series (Session 2)
 - b. Always add qualifier to the heading for unnumbered series
 - 2. Common/section titles (for us: series/subseries) [*Handout #4*]
 - a. Subseries title beginning with initial article
 - b. Main series doesn't/shouldn't have its own SAR: test for conflict using full title
 - c. Main series has/will have its own SAR
 - 1) Test main series first for conflict
 - 2) Then test heading for main series plus remainder of title
 - 3. Supplement not grammatically linked to main work
 - a. Test main work first for conflict
 - b. Then test heading for main work plus remainder of title
 - 4. Republications ("photo-offset reprint," microform, etc.)
 - a. Don't add element to identify republication
 - b. Use heading for original (may have own qualifier)

5. Change involving qualifier
 - a. Corporate body: name change/different body = new SAR
 - b. Different place: same SAR with see reference using later place as qualifier (*Handout #5*)
 - c. Change in place name [*Handout #6*]
 - d. Other qualifier: same SAR with information in 667 and see reference if needed
6. Title identical to name/initials of person or corporate body (includes conferences and jurisdictions)
 - a. Applies to all series, subseries, multipart items
 - b. Add "Series" as qualifier even if no title to title conflict
 - c. Exception for multiple qualifiers: as two separate qualifiers: (Series) (_____)

IV. Non-conflict situations requiring special uniform titles [*Handout #7*]

- A. Translations (25.5C)
 1. Bring together original and translation
 2. Use heading for original (may have own qualifier) and add language name as ¶l
- B. "Works" and "Selections" (25.8, 25.9, LCRI 25.8, LCRI 25.9)
 1. Exception to not predicting conflict: always add at first occurrence
 2. Date in heading and references (¶f)
 3. If still a conflict, add publisher

V. Conclusion/Review

- A. What are the two exceptions to the principle of adding a qualifier to the heading being established?
Answer:
- B. What is the first choice of qualifier for a generic title? For a non-generic title?
Answer:
- C. When you have a series/subseries, how do you decide what to test for conflict?
Answer:
- D. What qualifier is used if series title conflicts with the name/initials of person or

corporate body (includes conferences and jurisdictions)?

Answer:

VI. Questions?

VII. *Exercise*

TABLE OF SAR CONFLICT SITUATIONS

When entry of a **series/serial/phrase** is under **title**, a conflict exists when that title is identical to:

- the title of another publication already represented by an SAR*;
- the title of another publication represented by series found on bibliographic records*;
- the 245 title of another serial*;
- the title of another serial found in linking fields (760-787) of a serial;
- the title of another serial found in an access point on an existing bibliographic record*;
- the name or initials of a corporate body.

*regardless of choice of entry

When entry of a **series/serial/phrase** is under **name/title**, a conflict exists when that name/title is identical to:

- the name/title of another publication already represented by an SAR;
- the name/title of another publication represented by series found on bibliographic records;
- the 1XX/24X name/title of another serial;
- the name/title of another serial found in linking fields (760-787) of a serial;
- the name/title of another serial found in an access point on an existing bibliographic record.

If a new **phrase** heading would conflict with an existing **phrase** heading, do not establish the new heading consisting of the phrase plus a qualifier. **INSTEAD**, create an undifferentiated phrase record.

When entry of a **multipart item** is under **title**, a conflict exists when that title is identical to:

- the title of another publication entered under title already represented by an SAR;
- the title of another publication entered under title represented by series found on bibliographic records;
- the title of another monograph entered under title in the catalog;
- the name or initials of a corporate body.

When entry of a **multipart item** is under **name/title**, a conflict exists when that name/title is identical to:

- the name/title of another publication already represented by an SAR;
- the name/title of another publication represented by series found on bibliographic records;
- the name/title of another monograph in the catalog.

A **see reference** conflicts when the title or name/title reference is identical to a heading as noted for the various categories above.

A see reference **does not** conflict when it is identical to another see reference.

Changes in Place Names Used as Qualifiers in 130 SAR Headings

A place name can change in two different ways:

- the name of the higher jurisdiction changes; or
- the name of the local place changes.

The actions taken with respect to series authority record 130 headings differ depending on which kind of change has taken place.

The instructions below apply only when the place name is used as a qualifier for a heading that is title data; instructions for actions when a place name is used as a qualifier for a corporate heading are found in LCRI 24.4C4.

name of higher jurisdiction changes:

NAR: 151 Minsk (Belarus)
 451 Minsk (Byelorussian S.S.R.)

If the name of the higher jurisdiction changes, change the form of the place name used as qualifier to the latest form -- even though the publication began before the date of the change. Bibliographic file maintenance would be needed.

SAR: 130 _____ (Minsk, Byelorussian S.S.R.)

would be changed to:

130 _____ (Minsk, Belarus)

name of local place changes:

NAR 151 Saint Petersburg (Russia)
 551 Leningrad (R.S.F.S.R.)

If the name of the local place used as a qualifier changes, do not change the qualifier on the existing SAR and do not create a successive entry using the later form as the qualifier. The factual information represented in the qualifier is correct for the series issue used as the basis of the heading. Give a reference using the later form of the heading as the qualifier.

130 _____ (Leningrad, R.S.F.S.R.)
 430 _____ (Saint Petersburg, Russia)

TAB PAGE SESSION 8

Session 8 -- References

I. Introduction

II. See references (LCRI 26.5A; Z1 4XX)

A. Guidelines

1. Not dependent on treatment or type
2. Will have duplication with added entries on collected sets
3. Add qualifier to reference if conflict with title or heading
4. Trace reference in form it would have if it were the heading -- "no variants of variants"
5. Must be justified by 670 unless: (Z1 670)
 - a. Already justified by rules or LCRIs
 - b. Different romanization or orthography
 - c. Name/title references
 - d. Pre-AACR 2 forms

B. Alternate approaches (*Handouts #1-#2*)

1. Heading is uniform title
2. Heading is name/title proper
3. Heading is name/uniform title

C. Variants in same/another issue

1. Parallel series title(s) (*Handout #3*)
2. Other title information of series title [*Handout #4*]
3. Form(s) of series title on other source(s) in item (e.g., form on cover) (*Handout #5*)

D. Other situations

1. Partial series title (e.g., typographically prominent words, title minus the introductory generic noun, subseries title)
2. Alternate form(s) of series title (e.g., substituting word for symbol)
3. Specific situations (not all listed below):
 - a. If subseries entered separately, reference through main series
 - b. If name of serial in title, reference through serial
 - c. If heading has internal spacing or separating punctuation, reference without spacing or punctuation
 - d. Form representing another romanization or word division policy
 - e. Any other reference important for access

→ → → →

E. Variations in title that are not title changes (21.2A, LCRI 21.2A, LCRI 21.2C) -- in session 11

F. Conflict?

1. With heading: qualify reference to break conflict
2. With see reference: no conflict

III. See also references (5XX) -- in session 11

IV. Linking references (LCRI 26.5A, Z1 Introd., Z1 4XX)

- A. Purpose: connect two forms for outside libraries (as in NARs)
- B. Optional
- C. Not justified by 670
- D. Coding
 1. Same as NARs: ‡w nna or ‡w nnaa
 2. Most are name/title to title
- E. 667 note in lieu of reference (Z1 667)
 1. Not one-to-one relationship (*Handouts #6-#7*)
 2. Conflict (*Handout #8*)
 - a. Between reference and heading in same record
 - b. Between reference and heading in different record
 - c. Can't qualify linking reference to break conflict

V. Changes in reference policy (LCRI 26.5A)

- A. Add any references not in SAR (e.g., parallel titles)
- B. Don't delete any references: don't know variants in 1st 670

VI. Conclusion/Review

- A. Does the classification decision affect the references you trace?
Answer:
- B. How many references are given for each variant title?
Answer:

VII. Questions?

VIII. *Exercise*

IX. *General exercises*: add references.

Always repeat usage from priority-order source matching the heading; otherwise, 670
appears to document a title change that should have been represented by a new SAR
(given on existing SAR as a 530 see also reference rather than a 430 see reference).

add to existing SAR:

- 430 ‡a Magic series
- 670 ‡a [citation for next issue]: ‡b ser. t.p. (Boys' & girls' magic series) cover
(Magic series)

two "old catalog headings" vs. one AACR 2 heading

pre-AACR 2 analytics have different series added entries:

810 ‡a American Psychological Association. ‡t A.P.A. private practice series.

810 ‡a American Psychological Association. ‡t APA private practice series.

current issue has series title: APA private practice series

SAR being made:

130 ‡a APA private practice series

410 ‡a American Psychological Association. ‡t APA private practice series

430 ‡a A.P.A. private practice series

667 ‡a Includes the old catalog headings: American Psychological Association.
A.P.A. private practice series; American Psychological Association. APA private
practice series.

one "old catalog heading" vs. two AACR 2 headings

pre-AACR 2 analytics: series added entries

810 ‡a Society for String Instrumentalists. ‡t Monograph series.

pre-AACR 2 collected set record:

110 ‡a Society for String Instrumentalists.

245 ‡a Monograph series.

550 ‡a Numbers 1-8 issued by the society under its earlier name: Society for
Violinists & Cellists.

710 ‡a Society for Violinists & Cellists. ‡t Monograph series.

SAR being made:

130 ‡a Monograph series (Society for String Instrumentalists)

410 ‡a Society for String Instrumentalists. ‡t Monograph series

667 ‡a Previous to AACR 2 covered by the heading: Society for String
Instrumentalists. Monograph series.

667 ‡a Continues: Society for Violinists & Cellists. Monograph series [unevaluated
old catalog entry form]

linking reference conflict with heading/reference in same/different record

new SAR:

- 130 ⌘a Journal of dance. ⌘p Supplement
- 667 ⌘a Old catalog heading: Journal of dance : supplement.

new SAR:

- 130 ⌘a Serie "Historia política"
- 667 ⌘a Old catalog heading: Serie Historia política.

new SAR:

- 130 ⌘a Etudes anglaises
- 667 ⌘a Old catalog heading: Études anglaises.

new SAR:

- 130 ⌘a Collection Etudes atmosphériques.
- 430 ⌘a Etudes atmosphériques ([qualifier])
- 667 ⌘a Old catalog heading: Études atmosphériques.

because of existing SAR:

- 130 ⌘a Etudes atmosphériques

TAB PAGE SESSION 9

Session 9 -- Series-like phrases

I. Introduction

A. Definition

Series-like phrase: A character string (words, letters, combination of letters and numbers) not considered to be a series.

B. Decision often matter of judgment: first in database decides

C. Make SAR if you think someone will think it's a series

II. Searching

A. Search for SAR first

B. If no SAR, search for bibliographic records

1. If think it's a phrase, search as note
2. If think it might have been series before, search as series

III. Decision: series or series-like phrase (LCRI 1.6)

A. Some of the common situations that result in phrase SAR

1. Unnumbered restatement of body's name with indefinite article
(*Handout #1*)
2. Sub-imprint name or name of subsidiary (*Handout #2*)
3. Name of in-house editor (*Handout #3*)
4. "Series-like" word(s) when there's evidence not a series (*Handouts #4-#5*)
5. Lecture series, depending on presentation (*Handouts #6-#7*)
6. Embedded in text beyond preliminaries -- LC searches to see if already an SAR with 646 = "c" (*Handout #8*)
7. Slogan, motto, prize (*Handout #9*)
8. Unnumbered genre/characterizing word in singular form (or in plural form having singular meaning) appearing only on cover or on container
(*Handout #10*)
9. Unnumbered word(s) appearing only on cover/flaps or on container to indicate content for retail purposes (*Handout #11*)
10. Publisher's listing in broad categories with no other evidence of series
(*Handout #12*)

B. Usually don't make a phrase for numbers or numbers/letters not associated with a title

IV. Series authority record

A. Determining heading

1. AACR 2 choice and form - same possibilities as for series
2. Resolve conflict between phrase and non-phrase as for series
3. Resolve conflict between phrase and NAR heading/reference with "(Series)"
4. If conflict between two phrases, do undifferentiated phrase record (below)

B. Bibliographic details

1. 008/12 (OCLC = Series; RLIN = SRT) has value "c"
2. 643 and 670 same
3. 667 (*Handouts #13-#14*)
 - a. Give instructions how to handle the phrase
 - b. If series before:
 - 1) "Considered a series prior to _____."
 - 2) If it was collected, LC will add "(classified as a collection: [call no.])"
4. Undifferentiated phrase records (Z1 Introd.) (*Handout #15*)
 - a. 643
 - b. 667

C. No treatment fields

D. References (LCRI 26.5A)

1. 4XX: same as for series
2. 5XX: generally uncoded

V. Conclusion/Review

- A. Which treatment fields are included in a phrase SAR?

Answer:

- B. Name two situations that would be covered by phrase SARs.

Answer:

- C. What information must always be given in the 667 field?

Answer:

D. When should you make a phrase SAR?

Answer:

VI. Questions?

VII. *Exercise*

644 ‡a f ‡5 DLC (see first and second 667 fields below)
645 ‡a t ‡5 DPCC ‡5 DLC
646 ‡a s ‡5 DLC
667 ‡a To be considered a series title if the following
conditions apply: the words "A ticket to" are given by
the publisher on a source other than the title page
(will probably be on a series title page) and title of
volume given on title page is simply name of country.
667 ‡a Not considered a series title prior to December 1998
because words "A ticket to" were given only on title
page grammatically connected to the name of the
country. (The words "A ticket to" were recorded by
catalogers as the first words of the title proper in
the 245 field of the bibliographic record. The
presentation of "A ticket to ..." plus listing of countries on cover
p. 4 were not considered to constitute a series presentation.)
667 ‡a At least some of the works titled "A ticket to ...
are published in a version for older children with only
country name as title proper; these items appear in the
series "Globe-trotters club" (LCCN n96-86955)
670 ‡a A ticket to Russia, 1997: ‡b t.p. (A ticket to Russia)

PAGEMAKER® 4 MACINTOSH The Basics

Written by two renowned desktop publishing experts, *PageMaker® 4: Macintosh* is a hands-on guide to the basics and new features of this leading desktop publishing program. Packed with examples, this guide teaches the basic concepts of PageMaker 4 and provides tips on design, layout, and typography, as well as techniques for producing highly professional business documents.

- Shows how to use over 75 new PageMaker features quickly and efficiently
- Explains how to manipulate new typographic controls for more precise positioning of text, text rotation, and special type effects
- Uses examples from real publications to demonstrate how to create a newsletter, business report, book, or magazine
- Shows how to make the most of new color features—including PANTONE® colors—and the ability to import, display, and print color images
- Explains how to use the new file linking facilities, including the ability to track revisions of text and graphics files
- Provides the latest information on how to turn your Mac into a powerful desktop publishing machine

About the authors

TONY BOVE and CHERYL RHODES are editors of *The Bove & Rhodes Inside Report*, founders of *Publish* magazine, and best-selling authors of numerous computer books.

TAB PAGE SESSION 10

Session 10 -- Multipart items

I. Introduction

II. Definition

Multipart item: A monograph complete, or intended to be completed, in a finite number of separate parts. The separate parts may or may not be numbered. (AACR 2*)

III. Multipart vs. monographic series

- A. Default: monographic series (LCRI 1.0)
- B. Some publications of limited-duration activities covered by rules in chapter 12 (12.0A)* --- generally not analyzable

IV. To be analyzed? Not same as "Does volume have own title?" (*Handout #1*)

V. Series authority records

- A. Differences from an authority record for monographic series
 - 1. Only one SAR even if changes in title, etc. (21.2B2, 21.3A2)
 - a. Change in LC/PCC policy as of Dec. 1, 2002 -- don't condense SARs created before that date
[Pre-Dec. 2002 policy: one SAR for numbered multipart item; for unnumbered multipart item: as many SARs as there were changes]
 - b. Possible rule change: remove concept of predominance
 - 2. 008/12 (Series; SRT) = value "b"
 - 3. Use of "analyzable parts" in 644 ≠d
 - 4. "Works" or "Selections" uniform title
 - 5. Context for testing for conflict
 - 6. Not to be analyzed = classified as a collection
 - a. LC doesn't make SAR
 - b. Your choice to make or not make SAR
 - 7. Use of 640 for number of volumes

- B. Same as an authority record for monographic series = everything else

VI. Possible configurations

- A. Not to be analyzed (*Handouts #2-#5*)
 - 1. Bibliographic collected set record - contents note sometimes
 - 2. No analytics
 - 3. No SAR by LC
- B. To be analyzed - classified as a collection (*Handouts #6-#7*)
 - 1. Bibliographic collected set record - contents note
 - 2. Analytics with 4xx/8xx
 - 3. SAR
- C. To be analyzed - classified separately (*Handouts #8-#9*)
 - 1. Analytics with 4xx/8xx
 - 2. SAR

VII. Collected set records

- A. 260 \ddagger c and 008
- B. 300 \ddagger a
- C. 505
- D. Subfield \ddagger v when multipart item in series (LCRI 1.6G2)

VIII. LC's guidelines for multipart item treatment decisions (*Handout #10*)

IX. Conclusion/Review

- A. What is a multipart item?
Answer:
- B. How many SARs would be in the authority file for three changes in title of an analyzed numbered multipart item? Of an analyzed unnumbered multipart item?
Answer:

X. Questions?

XI. *Exercise*

* = change in AACR2, *Revision 2002*

Multiparts: Analyze?

Titles that are not distinctive should not be analyzed. The following guidelines (based on LCRI 25.6A for another situation) can be used to determine whether or not a title is distinctive:

- 1) an alphabetic or numeric division ("part 1," "part 2;" "A," "B;" etc.)
- 2) chronological subdivisions ("from 1918 to 1935," "from 1936 to the present;" "14th century," "15th century;" "early times," "present times;" etc.)
- 3) alphabetic subdivisions ("A-L," "M-Z")
- 4) geographic subdivisions ("New England," "Midwest;" "Great Britain," "Scandinavia;" etc.)
- 5) phrases that omit an essential piece of information found in the collective title ("teeth," "fossilized footprints," etc., when the collective title is "Dinosaur relics")
- 6) general terms such as "atlas," "glossary," "index," etc.

Multipart Item Treatment Decisions at LC

Unnumbered multipart items:

Make an SAR:

Analyze in full (644 = f)

Trace (645 = t)

Classify separately (646 = s)

Numbered multipart items:

Title proper of each part is not distinctive:

Make only a collected set bibliographic record. Do not make separate bibliographic records for the parts. Do not make an SAR.

Title proper of each part is distinctive:

Make an SAR:

Analyze in full (644 = f)

Trace (645 = t)

Classify the following as a collection (646 = c):

1. The collected works of a literary author or an author writing mainly in one discipline.
2. A two-volume set.
3. The proceedings of a conference.
4. Multipart item meant to be treated as a set, indicated by the presence of introductory or summary volumes, a separate index volume, continuous paging, etc.
5. When the topic of the set and its treatment in the LC classification schedules would result in the analytics classing in the same or close LC class numbers if they were classified separately.
6. Multipart item covering a discrete topic chronologically or geographically in the analytics.

Classify everything else separately (646 = s)

(including (a) literary trilogies, etc.

(b) multipart items of which it is expected LC will acquire only one part or a few parts)

TAB PAGE SESSION 11

Session 11 -- Successive entries

I. Introduction

II. Cataloging rules have handled changes for serials differently

- A. ALA: latest entry with all on one record with references/added entries for earlier situations
- B. AACR 1
 - 1. One entry for each change with linking notes -- LC delayed implementation until 1971
 - 2. Title of short duration
- C. AACR 2
 - 1. One entry for each change with linking notes
 - 2. No title of short duration

III. Categories of change requiring a successive entry (i.e., a new SAR) for series/other serials

- A. "Major change" in title proper (regardless of choice of entry) (21.2A, 21.2C1) -- more below
- B. Personal name main entry: different person responsible --- not common (21.3B1)
- C. Change in body main entry (21.3B1):
 - 1. Same body with different name
 - 2. Different body
- D. Change in body used as qualifier in uniform title heading (21.3B1):
 - 1. Same body with different name
 - 2. Different body
- E. Change in title used as uniform title heading for a translation (LCRI 21.3B)
- F. Physical medium changes (LCRI 21.3B)
- G. Numbering
 - 1. New SAR:
 - a. Numbered series becomes unnumbered (LCRI 1.6)
 - b. Unnumbered series becomes numbered & starts with "1" (LCRI 1.6)

2. Not a new SAR:
 - a. Some issues in numbered series lack numbering (LCRI 1.6)
 - b. Unnumbered series becomes numbered with next number after total number of unnumbered volumes (LCRI 1.6)
 - c. Numbered series rennumbers with "1" (1.6G1, 12.3G1)
 - i. With or without "new series"
 - ii. With same/different system of numbering

IV. How many AACR 2 SARs for changes noted above? (Z1 5XX) (*Handout #1*)

A. Series/Serial (21.2A, LCRI 21.2A, 21.2C, LCRI 21.2C, 21.3B, LCRI 21.3B, LCRI 1.6, LCRI 1.6H)

1. "Major" change = separate SAR with 5XX
 - a. If unnumbered, generally uncoded 5XX (*Handout #2*)
 - b. If numbered, coded 5XX if numbered (*Handouts #3-#5*)

2. "Minor" changes = same SAR, sometimes with 4XX

B. Phrases: every change = separate SAR with generally uncoded 5XX (*Handout #7*)

C. Multiparts (21.2B2, 21.3A2, LCRI 26.5A)

- a. One under earliest person/body/title with later covered by 4XX
 - i. Policy before Dec. 1, 2002: multiple SARs for unnumbered multipart items
 - ii. Don't condense records created before Dec. 1, 2002
- b. AACR2: If later predominates, change to later with earlier covered by 4XX but LCRIs for 21.2B2 and 21.3A2: do not change

D. SAR itself

1. 675 and 5XX if other represented by SAR
2. 667 if other not represented by SAR (*Handout #6*)

V. Closer look at 21.2A/LCRI 21.2A for changes of title proper

A. Background

1. Prior partial harmonization with ISSN guidelines
2. 2002 Revision of AACR2: harmonization with ISBD(S) (now ISBD(CR)) and with ISSN guidelines

B. Scope of rule/RI

1. Rule: all bibliographic resources except integrating resources

2. LC/PCC practice: doesn't apply to multipart items because description not changed for predominance

C. "Major change" vs. "minor change" (21.2A) *

1. Major change (21.2A1)

- a. Addition, deletion, change, or reordering of any of first 5 words (6 if initial article) unless change fits one of categories of minor change
- b. Addition, deletion, or change of any word after the first 5 words (6 if initial article) that changes meaning or indicates a different subject
- c. Change in name of corporate body (not just issuing body) anywhere in title if it is a different corporate body (i.e., if need separate NARs)

2. Minor change (21.2A2) -- many of additions to the rule came from LCRI

- a. Difference in the representation of a word or words anywhere in the title [some in list of examples "moved" from LCRI]
LCRI: "spelling" includes ordinary orthographic variations and official orthographic changes; "change in grammatical form" includes singular vs. plural, adjective vs. noun, and genitive vs. nominative
- b. Addition, deletion, or change of articles, prepositions, or conjunctions anywhere in the title
- c. Difference involving name of the same corporate body/hierarchy anywhere in the title (e.g., addition, deletion, rearrangement, substitution)*
Note: change in 2002 Revision is "anywhere in the title"
LCRI: also includes name of official and body to which bibliographic resource is being presented; if change requires a new NAR, consider it to be a "major change" in title
- d. Addition, deletion, or change of punctuation anywhere in the title
- e. Different order of titles when the title is given in more than one language in the chief source of information and the title chosen as title proper will still appear as a parallel title ["moved" from LCRI]
- f. Addition, deletion, or change of words anywhere in the title that

link the title to the numbering ["moved" from LCRI]

- g. Two or more titles proper used on different issues of a serial according to a regular pattern ["moved" from LCRI]

LCRI: also includes situation when language of the title varies according to the language of the text; restrictions on title of short duration

— see “flip-flop” below

- h. Addition to, deletion from, or change in the order of words in a list anywhere in the title, provided that there is no significant change in the subject matter*

LCRI: a list = 3 or more terms

- i. Addition or deletion anywhere in title of words that indicate the type of resource (e.g., journal, series)*

Note: rule doesn't say "rearrangement" as it does for name of corporate body [category c]

LCRI: change from word to another (e.g., “series” to “journal”) is a major change; frequency word (e.g., “monthly”) does not indicate a

type

of resource

- j. Default: minor change*

D. Impact

1. Database: existing SARs for changes no longer “major changes” --- do not condense existing SARs
2. Title in hand different from established form but not a “major change” (LCRI 26.5A) (*Handout #8*)
3. Re-establishing series: title in hand different from form on pre-AACR 2 analytics but not a “major change” (Z1 Introd.) (*Handout #9*)

VI. “Flip-flop” and title of short duration (*Handout #10*)

A. One record (LCRI 21.2A)

B. References (LCRI 26.5A)

C. What equals flip-flop is relative to publishing pattern and to total number of issues

D. Restrictions (LCRI 21.2A, category g):

1. Only retrospectively (handle as change first time unless you have info when creating SAR), and
2. No records exist in shared databases, and
3. No ISSNs have been assigned

VII. Conclusion/Review

- A. Name three possibilities for change.

Answer:

- B. How many SARs are made for changes of phrase?

Answer:

- C. How many SARs are made for changes of multipart item?

Answer:

- D. How many SARs are made for changes of series/serials?

Answer:

- E. Name three categories of change in a title proper considered to be a "major change."

Answer:

- F. Name four categories of change in a title proper considered to be a "minor change."

Answer:

VIII. Questions?

IX. *Exercise*

earlier/later relationship

Series/serial

unnumbered: 675 + 5XX generally with no ¶w

numbered: 675 + 5XX ¶w a
675 + 5XX ¶w b

Phrase: 675 + 5XX generally with no ¶w

Multipart item: 670 + 4XX (cf. Z1 4XX)

If both entities in 1XX/5XX relationships are not represented by SARs, use 667 instead of 5XX for the entity lacking an SAR:

"minor change" -- not successive entry (21.2A/LCRI 21.2A)

existing SAR:

130 0 ‡a Economic report

issue in hand: Economic reports

action:

add to existing SAR:

430 0 ‡a Economic reports

and: 667 ‡a Some issues have title: Economic reports.

or: 670 [citation with usage for issue in hand]

existing SAR:

130 0 ‡a Publication (Tuckahoe Parent-Teacher Association)

issue in hand: Publication of the Tuckahoe Parent-Teacher Association

action:

add to existing SAR

430 ‡a Publication of the Tuckahoe Parent-Teacher
Association

and: 670 [citation with usage for issue in hand]

or: 667 ‡a Some issues have title: Publication of the Tuckahoe Parent-Teacher
Association.

re-establishing series: "minor change" in title proper (21.2A/RI21.2A)

pre-AACR 2 analytics with series added entries: Music and musicians.

issue in hand:

no. 11: Music & musicians.

SAR being made based on no. 1:

130 ⌘a Music and musicians

430 ⌘a Music & musicians

670 [for no. 1]

670 [for no. 11]

if no. 1 not available, base SAR heading on item in hand:

130 0 ⌘a Music & musicians

430 0 ⌘a Music and musicians

670 [for no. 11]

667 ⌘a Some issues have title: Music and musicians

or: 670 [database citation showing earlier form]

code 008/33 (Auth status; STH) as "c" (provisional)

variations in title: flip-flop

Note: must meet conditions in LCRI 21.2A: retrospectively or see whole run; no ISSN assigned.

SAR for 1-5:

130 0 ‡a ASB study
530 0 ‡w b ‡a Study (American Society of Balloonists)
670 [citation for no. 1 with usage]
675 [citation for no. 6 with usage]

SAR for 6:

130 0 ‡a Study (American Society of Balloonists)
530 0 ‡w a ‡a ASB study
670 [citation for no. 6 with usage]
675 [citation for no. 1 with usage]

title of issue 7 in hand: ASB study

actions:

- cancel SAR for Study (American Society of Balloonists)
- modify SAR for ASB study:

add:

430 0 ‡w nne ‡a Study (American Society of Balloonists)
667 ‡a Number 6 has title: Study
670 [citation for no. 6 with usage (from cancelled SAR)]
670 [citation for no. 7 with usage]

delete:

530 0 ‡w b ‡a Study (American Society of Balloonists)
675 [citation for no. 6]

- change/add 830 to bibliographic record(s) for the analytic(s)

TAB PAGE SESSION 12

Session 12 -- Modifying SARs

I. Introduction

II. Some of the reasons an SAR is modified

- A. Imprint variations
- B. Numbering variations
- C. Variations not title changes
- D. Variants in other issues
- E. New issuing body
- F. Later/earlier entry
- G. Treatment changes/additions
- H. Typos

III. Reasons an SAR is cancelled

- A. Duplicates
- B. Flip-flops
- C. Subseries with and without main series
- D. Request cancellation

IV. General guidelines (Z1 Introd.)

- A. Adding information
- B. Changing information
 - 1. What must be corrected
 - 2. What doesn't need to be changed
- C. Changing the heading
 - 1. Impact in authority file --- your responsibility
 - a. References on same and other SARs
 - b. Subseries SARs
 - 2. Impact in bibliographic files
 - a. Your responsibility to say BFM needed; giving old form of heading very helpful
 - b. LC responsibility to identify and change records
- D. Adding place/publisher information
 - 1. Don't need to justify
 - 2. If more than three, give general note in 667
- E. Adding 670: always give the priority source that has usage still matching the heading/21.2A reference and then the variant in another source
- F. Adding references
 - 1. Justify variant form of title

2. Don't justify:

- a. Already justified by rules or LCRIs (e.g., partial title reference, reference substituting one form for another in the title)
- b. Reference giving different romanization or orthography
- c. Name/title reference if name new but title is same
- d. Pre-AACR 2 forms
- e. Adding references to "n42-" SAR for collected series

G. Don't modify

- 1. SAR being updated (008/31 = b) [OCLC=Upd status; RLIN=UIP]
- 2. Early notice record (Leader, pos. 17 = o) [OCLC = Enc lvi; RLIN = EL]
- 3. If either of above older than 1 month, notify CPSO (cpsso@loc.gov)

V. Conclusion/Review

- A. What kind of reference must you always justify?

Answer:

- B. Do you need to justify change in publishing information?

Answer:

VI. Questions?

TAB PAGE SESSION 13

Session 13 -- General review

I. Discussion of general exercise

II. Review exercises

III. Discussion of review exercises

IV. Questions?

V. Information from Cooperative Cataloging Team

VI. Evaluation
